

Quantic™ Wenzel

EMPLOYEE SUCCESS STORY

Zach Logan
Electronics Technician II

Zach Logan, an Electronics Technician at Quantic Wenzel since February 2021, excels in ensuring our frequency control and timing solutions meet high-performance standards, particularly in complex products like the Bootstrap Oscillator. Zach's first job at a furniture warehouse when he was very young instilled a strong work ethic that he carried into his role at Quantic Wenzel. First mentored by colleagues like Steve Maldonado and Jesus Cura, Zach's career has thrived in the supportive environment provided by Quantic Wenzel. When asked about his favorite product lines, he quickly mentions our ONYX and Streamline series OCXOs, citing the balance of performance and value they bring our customers. Outside of work, Zach is a multi-talented musician for hire, he has a passion for drums and outdoor adventures like hiking in the Ozarks with his Golden Retriever, Winnie. He values the company's commitment to work-life balance, especially half-day off Fridays. Zach's dedication to personal and professional growth makes him a great asset to our team!

“

From the start, Quantic Wenzel has provided me with the support and mentorship needed to thrive in my role. From pushing performance boundaries on innovative projects to pursuing my passions outside of work, I've found a perfect balance here. Quantic Wenzel's commitment to excellence and work-life balance truly sets it apart.

-Zachary Logan
